## About Me

I am a 4th year UCSB Computer Science student interested in all software development but specifically web and mobile development. With experience in both front-end and back-end languages I can operate as a Full-Stack developer, and my background in visual arts ties into my passion for user interface design.

## Software Development

**Programming Languages:** C++, Java, some Python, Javascript, HTML, CSS

**Frameworks:** Next.js, Node.js

**Tools:** Git, Github, NPM, Linux (Ubuntu, Fedora, Manjaro)

### Skills:

- \* strong knowledge of object-oriented programming, Agile, and Test Driven Development
- \* experience in developing static websites and full scale web applications
- \* Team Programming, server management, and database management

## Education
